## Overview

One of the primary functions of **YuniquePLM™** is to create organized folders for new product data, otherwise known as a Style Folder. Style Folder contains all of the detailed information or workflows related to the product being developed. For example, all information related to constructing, measuring, and even packaging the product for shipping could be contained within the Style Folder.

The **Design Detail** page contains instructional details related to the style.

## Design Detail

1. Select the **Style** drop-down arrow within the left-hand navigation bar.
2. Click on **Style Search** to open the *Style Folder*.
3. Locate and select a preferred **style**.

For further Style Folder information, refer to the *Style Folder Overview User Guide*.

The screenshot shows the YuniquePLM interface. On the left, the navigation bar has 'Style' highlighted with a red box and an arrow. The main area is titled 'Style Folder' and shows search filters and a table of style records. A red box highlights a row in the table.

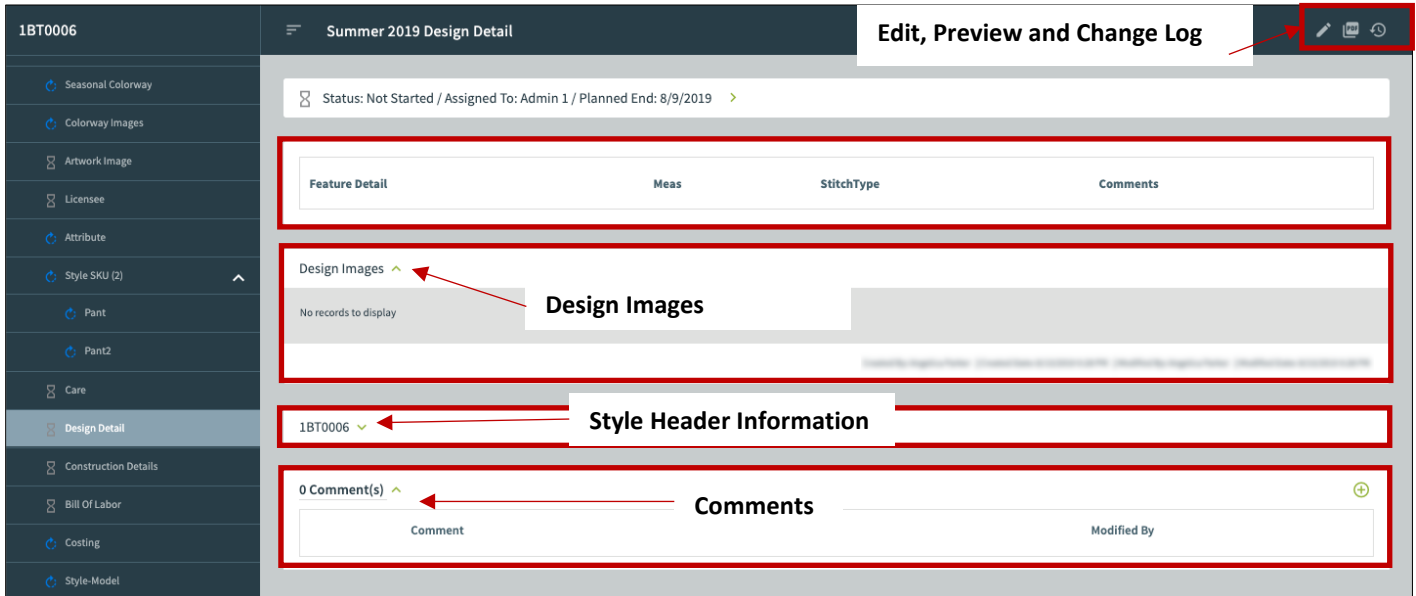

Style No	Description	Division	Style Type	Sub Category	Style Category	Size Class	Size Range	Intro Season Year	Season	Year	Tech-Pack Due	Status
18FT003	Woven Tops	Yunique Apparel	Apparel	Woven Tops	Missy	0 - 20	Fall 2020	Fall	2020	T/21/2019	In Progress	Yi
15W0004	flat front pants	Yunique Apparel	Apparel	Sweaters	Mens	X5 - XL	Winter 2021	Winter	2021	8/12/2019	In Progress	Yi
18FT002	Woven Tops	Yunique Apparel	Apparel	Woven Tops	Missy	0 - 20	Fall 2020	Fall	2020	T/21/2019	In Progress	Yi
12W0003	flat front pants	Yunique Apparel	Apparel	Sweaters	Mens	X5 - XL	Winter 2021	Winter	2021	8/12/2019	In Progress	Yi

4. Select the **Design Detail** link to open its workflow page.

The screenshot shows the YuniquePLM Design Detail page for style 1BT0006. The left navigation bar has 'Design Detail' highlighted with a red box. The main area shows the design detail workflow page.

## Style Folder - Design Detail User Guide V8.X

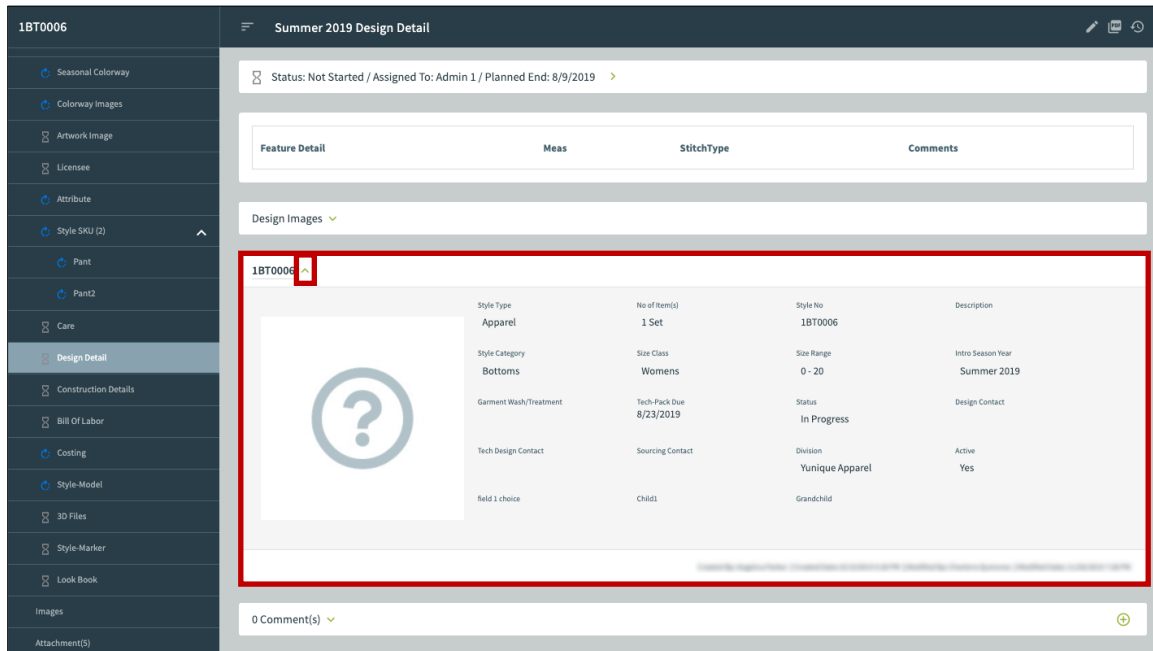

### Design Detail Overview

### Style Header Information

The style header area contains the style's details for the *Design Detail* page.

1. Click the **green arrow** to expand/collapse the Style header information area.

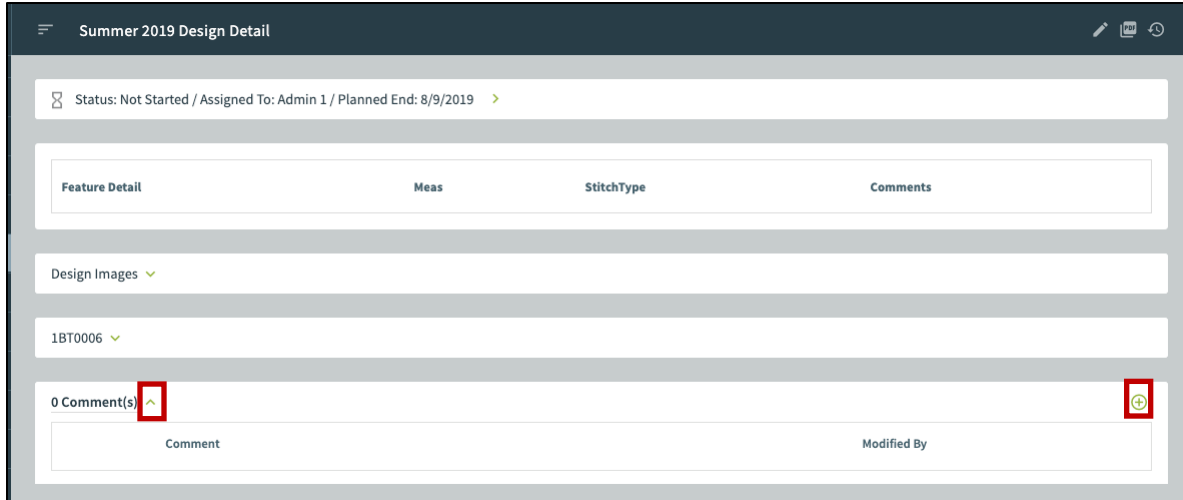

## Style Folder - Design Detail User Guide V8.X

### Comments

Include a note or instructions affecting this style.

1. Click the bottom **green arrow** to expand/collapse the *Comment(s)* section.
2. Press the **+ Add New** button, then type comments into the textbox.

3. Once finished, select the **save** button.

4. Now the newly added comment appears in the *Comment(s)* section. Click the **pencil** icon to edit the existing comments or click on the **+ Add New** button to enter additional comments if needed.

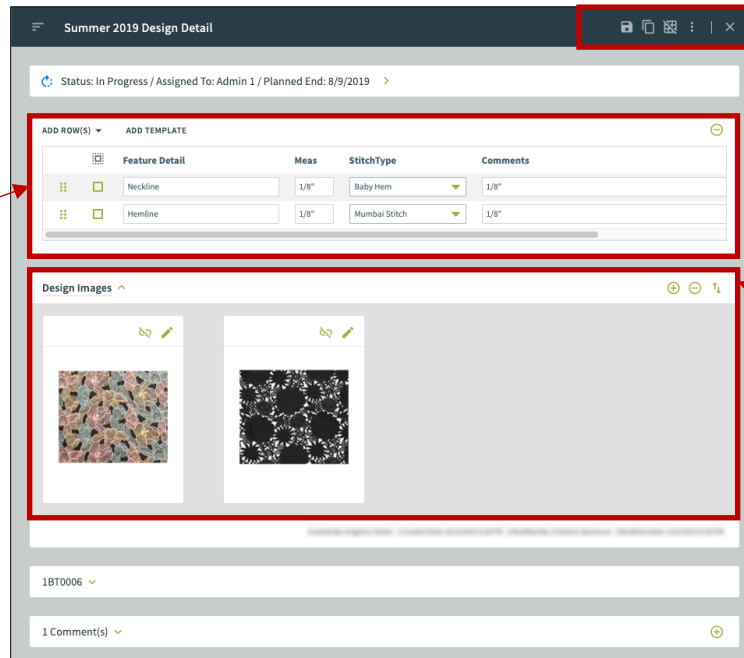

## Style Folder - Design Detail User Guide V8.X

### Edit

The Edit button allows users to view and modify the *Design Detail Templates* and their associated images. Selecting the *Edit* (pencil) button displays the edit view.

**Grid – Edit options:**  
add rows, add template, sort

**Edit Options:**  
save, copy, show/hide grid, change log and close.

**Design Images – Edit Options:**  
add, remove and sort images

### Edit Options

**Save:** Keep the newly added or modified Design Detail template.

**Copy:** Use an existing *Style's Design Detail* template.

**Show/Hide Grid:** When pressed, the button toggles between showing and hiding the grid.

**Add Rows:** Add the necessary amount of rows for the template.

**Add Template:** Copy an existing design template created within the Control Panel.

**Sort Grid:** The grid can be sorted by dragging and dropping the sort icon  in front of every row, to the desired location.

**Add Images:** Link images to this style by creating or selecting existing images.

**Remove Images:** Delete linked images associated with this particular style.

**Sort Images:** Sort images by order of preference.

**Change Log:** Lists a history of changes made within this particular style section.

**Close:** Closes the edit design detail template screen.

## Style Folder - Design Detail User Guide V8.X

### Add Images

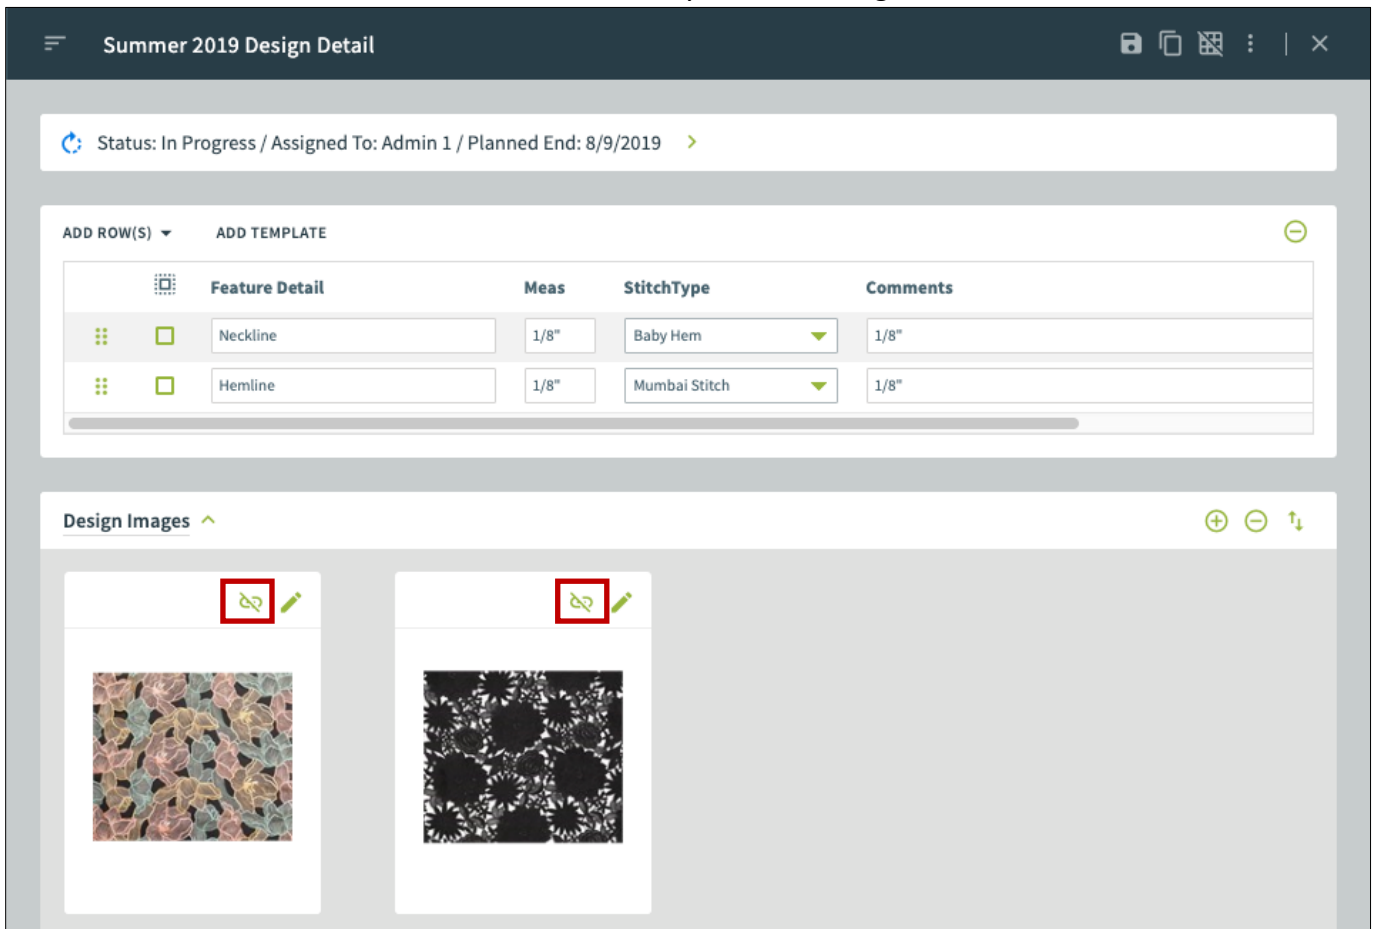

Design Detail Images can be added to the page to enhance the instructions listed in the template visually. There are three ways to add a design detail image: **Create** a new image, **Select** an image from existing images in YuniquePLM and **Copy** an image associated with another style.

*For further information, refer to the Image Folder User Guide.*

### Break Link

All copied images contain a break link button. Images saved to a particular style are linked to multiple size class variations. Any edits made to an image within a style are also applied to all size classes.

Once the **break link** button is selected, the image is 'unlinked' from all size classes, except the current residing size class. Now the user can make modifications to the newly unlinked image.

The screenshot shows the 'Summer 2019 Design Detail' interface. At the top, there is a status bar: 'Status: In Progress / Assigned To: Admin 1 / Planned End: 8/9/2019'. Below this is a table with columns: Feature Detail, Meas, StitchType, and Comments. The table contains two rows: 'Neckline' with '1/8"' measurement and 'Baby Hem' stitch type, and 'Hemline' with '1/8"' measurement and 'Mumbai Stitch' stitch type. Below the table is a 'Design Images' section with two image thumbnails. Each thumbnail has a red box around a break link icon (a crossed-out chain link) and a pencil icon, indicating that the images are unlinked and can be edited.

Feature Detail	Meas	StitchType	Comments
Neckline	1/8"	Baby Hem	1/8"
Hemline	1/8"	Mumbai Stitch	1/8"

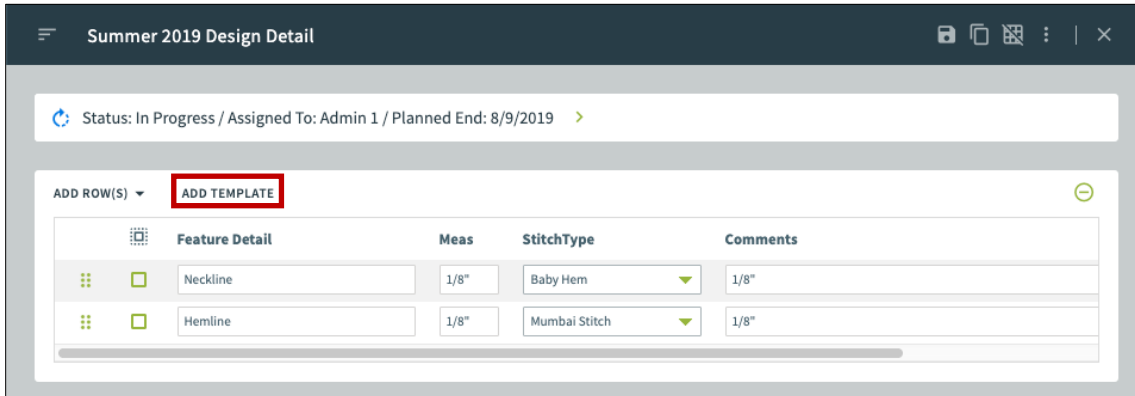

## Style Folder - Design Detail User Guide V8.X

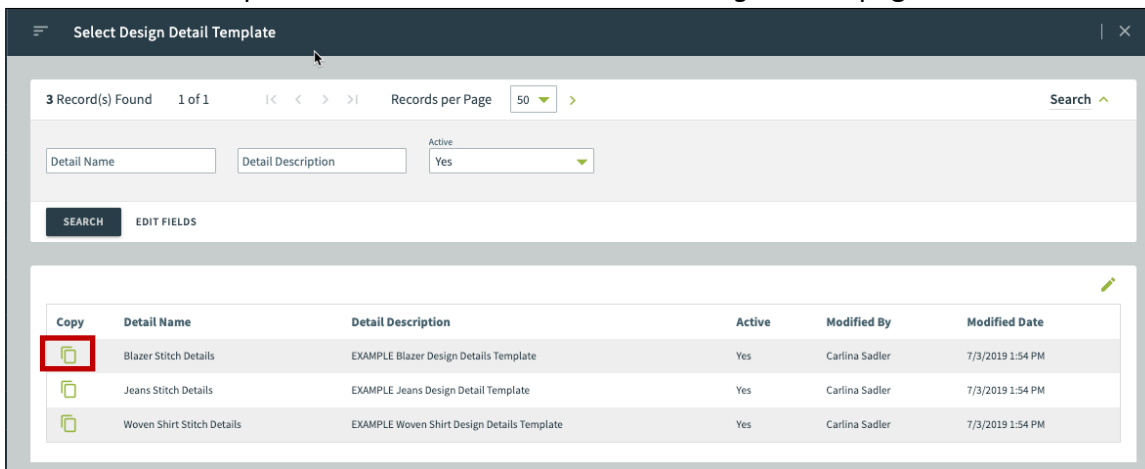

### Design Detail Templates (Show/Hide Grid)

The Show/Hide Grid button toggles between displaying and hiding the *Design Detail Template* grid. The Design Detail related information can be stored as a template and housed in the *Control Panel* of the YuniquePLM application. Not all users may have permission to generate templates. However, they may add from a list of available templates.

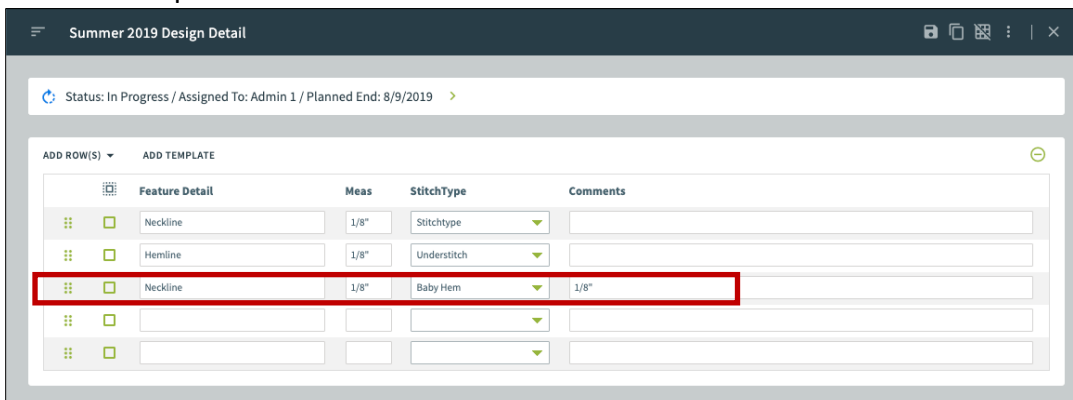

1. Click the **Add Template** button to open the *Design Detail Template* page.

2. The *Design Detail Template* page is shown and lists available templates. Click the **copy** button adjacent to the desired template. The user is returned to the *Design Detail* page.

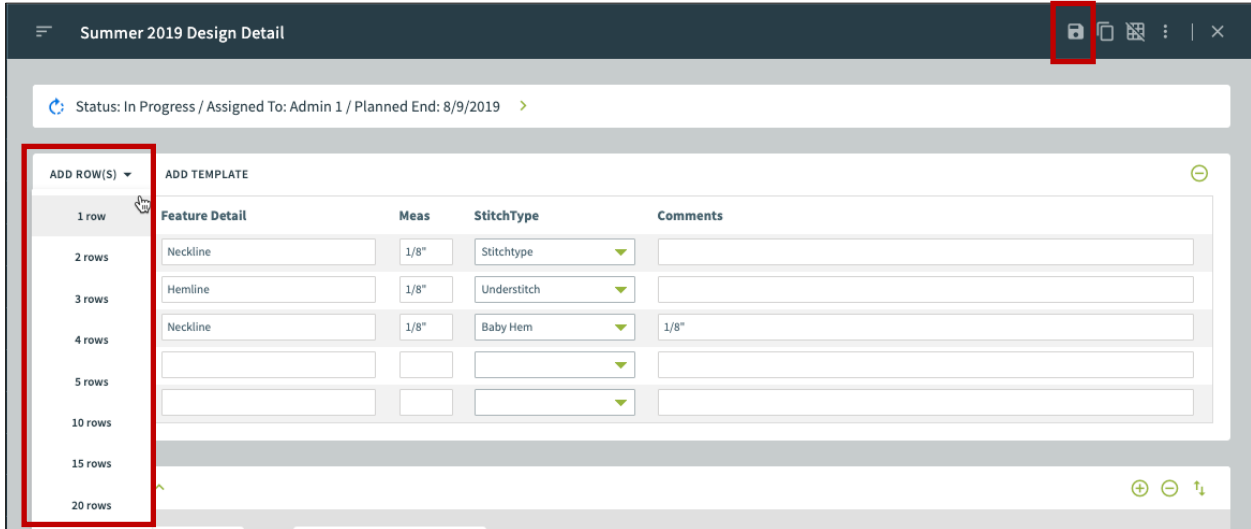

3. The Design Detail page now lists each of the pre-selected template's data within the grid. Each field can be modified, by either **clicking within the field** and **typing new data** or selecting a **new StitchType** within its drop-down.

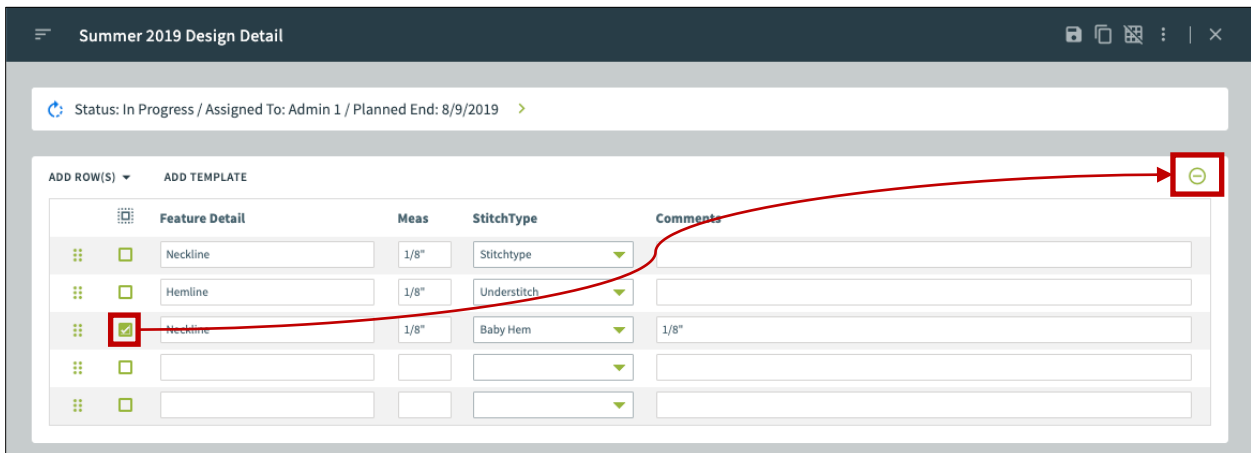

Style Folder - Design Detail User Guide V8.X

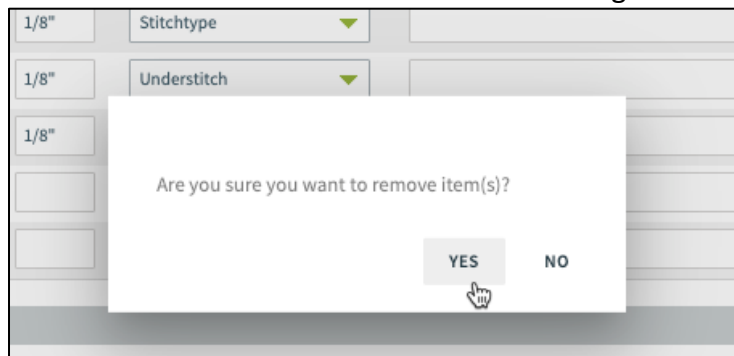

- Adding specific instructions not included within the template is simple. Use the drop-down adjacent to the **No. of Row(s)** and select the desired amount.
- The newly added fields appear at the bottom of the grid. **Type** the new design detail related line items within each of their respective fields. Once finished, click the **save** button.

- If a user needs to remove a feature, place a checkmark next to the line item and click the **delete** button.

- Once deleted, click **Yes** to confirm the deletion or click **No** to disregard.

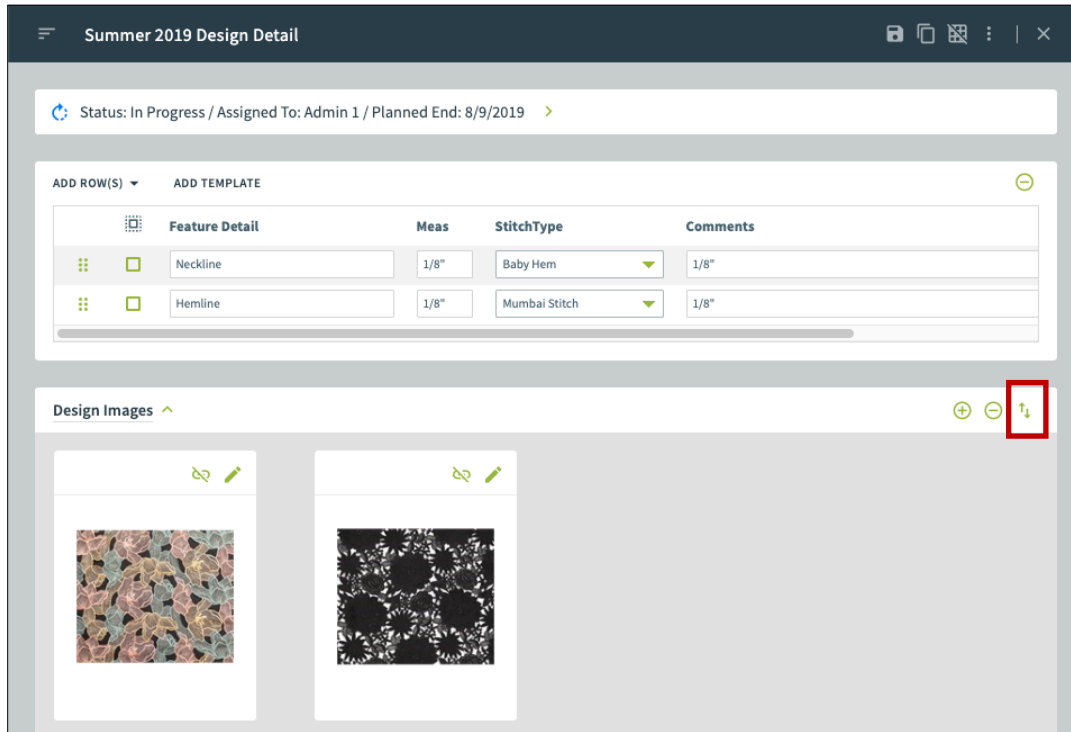

Style Folder - Design Detail User Guide V8.X

Sort Images

Existing images can be rearranged to the users' preference.

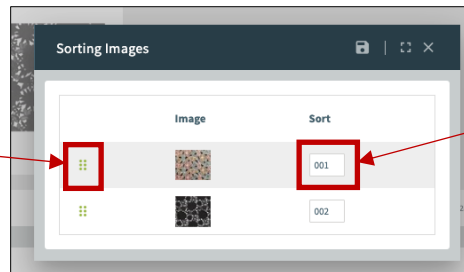

1. Click the **sort** button to open its window.

2. The *Sorting Images* area provides the user with two options:

- **Drag and drop:** Click on the *list item* to drag and drop a style to a preferred order.
- **Sort Value:** Enter a sort order number.

Click and drag this area into the preferred order.

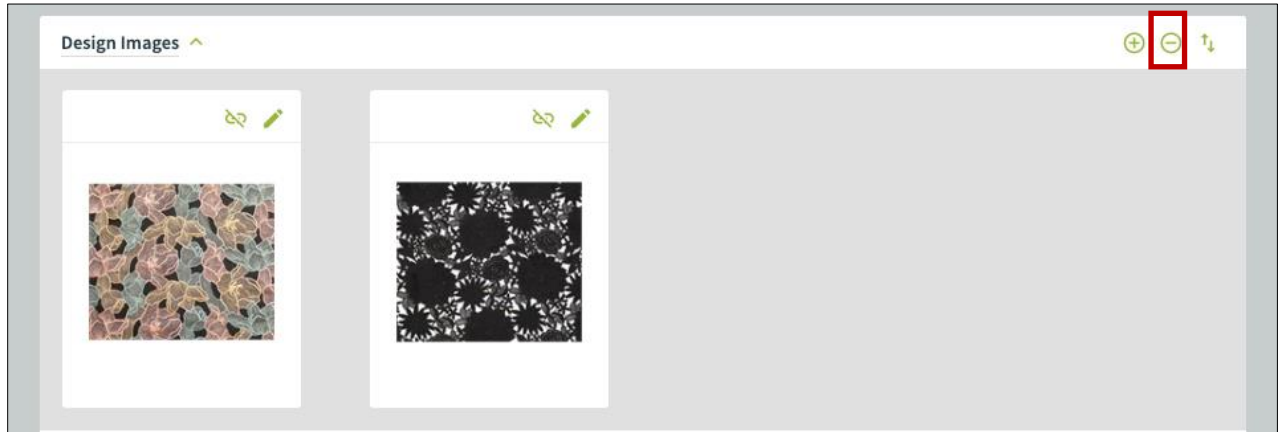

Enter a # to represent the desired sort order sequence.

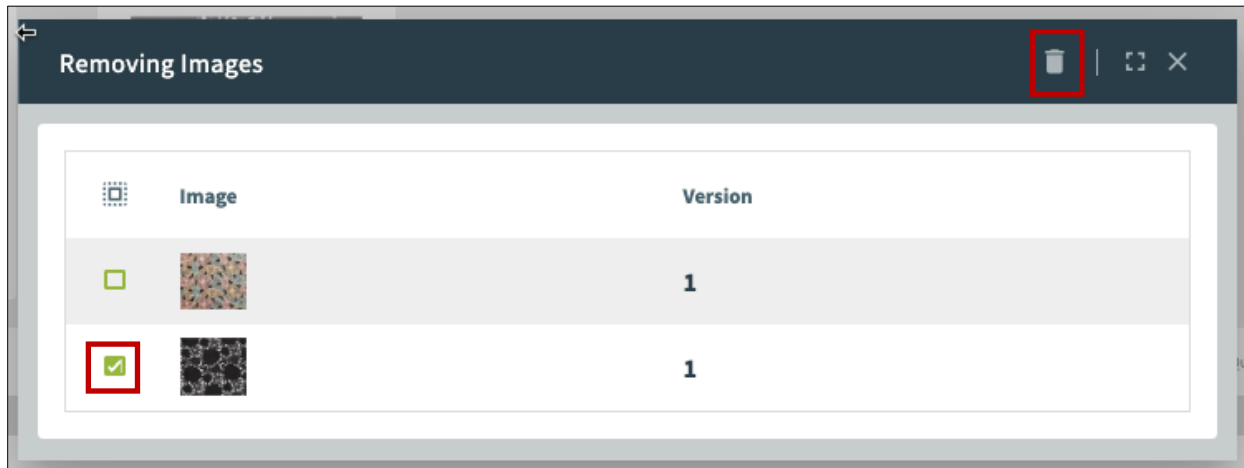

3. Click **save** to keep the changes and exit the window. The newly sorted images appear within the Design Detail main page.

Remove Images

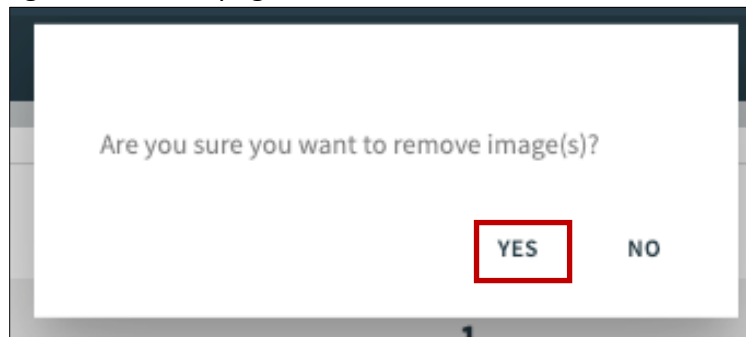

1. Select the **remove** button to delete an unwanted image.

2. The *Removing Images* window opens and reveals a list of available images. Check the unwanted image's **box** then press **remove**.

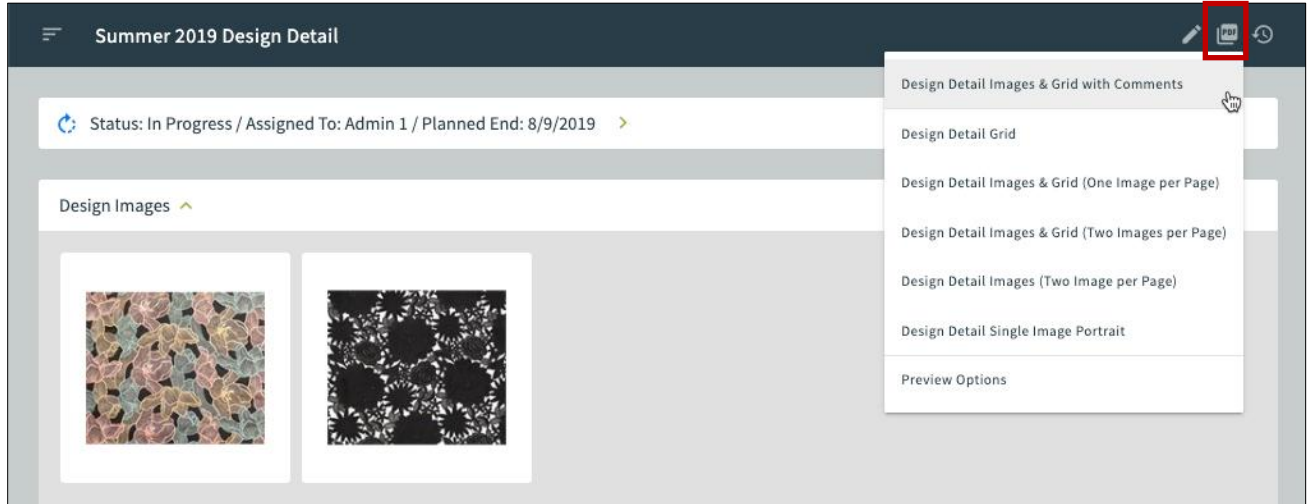

3. A removal confirmation window opens. Click **Yes** to confirm the deletion. Once confirmed, the user is returned to the Design Detail main page.

Preview

1. Generate a *Design Detail* report by clicking the **preview** button at the top of the page. A drop-down opens to reveal a list of available reports.
2. Select a **report** from the list.

3. The user is immediately notified with two notifications, where the first states that the report is currently being generated, while the second states the report has been successfully generated. Click on the notification to view the report.

**Note:** Users may also select *Preview Options* located at the bottom of the list. This functionality allows the user to select a preferred language and default report. Keep in mind, these settings are specific to this workflow.

4. Click the **Close** button to return to the main *Design Detail* page.
