## Overview

The **Style - Model** page allows users to import and modify pattern information into **YuniquePLM** from the Gerber **AccuMark** system. An AccuMark PLM integration setup is required to add a Style Model. More details can be found within the *YuniquePLM AccuMark Integration user guide*

## Style - Model

1. Select the **Style** drop-down arrow within the left-hand navigation bar.
2. Click on **Style Search** to open the *Style Folder*.
3. Locate and select a preferred **Style**.

*Refer to the Style Folder Overview User Guide for further information.*

The screenshot shows the 'Style Folder' interface. On the left, the navigation menu has 'Style' selected, highlighted with a red box and an arrow labeled 'Style'. The main content area displays search filters and a table of style records. A red box highlights a row in the table with the following data:

Style No	Description	Division	Style Type	Sub Category	Style Category	Size Class	Size Range	Intro Season Year	Season	Year	Tech-Pack Due	Status	A
19WT003	Woven Tops	Yunique Apparel	Apparel		Woven Tops	Missy	0 - 20	Fall 2020	Fall	2020	7/21/2019	In Progress	vi
19W004	flat front pants	Yunique Apparel	Apparel		Sweaters	Mens	XS - XL	Winter 2021	Winter	2021	8/12/2019	In Progress	vi
19WT001	Woven Tops	Yunique Apparel	Apparel		Woven Tops	Missy	0 - 20	Fall 2020	Fall	2020	7/21/2019	In Progress	vi
19W003	flat front pants	Yunique Apparel	Apparel		Sweaters	Mens	XS - XL	Winter 2021	Winter	2021	8/12/2019	In Progress	vi

4. Select the **Style – Model** workflow page to import a pattern.

The screenshot shows the 'Winter 2021 Style-Model' workflow page. The left navigation menu has 'Style-Model' selected, highlighted with a red box. The main content area displays a table of material associations for 'IMPERIAL'.

## Style Folder-Style Model User Guide V8.X

### Style - Model Overview

The screenshot shows the 'Winter 2021 Style-Model' interface. It includes a top navigation bar with icons for Copy, Link, Preview, and Change Log. Below this is a status bar showing 'Status: In Progress / Assigned To: Admin 1 / Planned End: 3/15/2020'. The main content area is divided into several sections:

- Models Area:** A table listing models with columns for L, LBF, Model Name, Location, Description, Sample Size, # of Sizes, # Materials, # Pieces, Comments, Last Modified By, Last Modified Date, AM Last Modified By, and A M D. The table contains three rows of data.
- Material Association:** A section with a table for associating materials by Model Name, Fabric Type, and Material Code.
- Style Header Information:** A detailed view for style '2JE0025 - 1' showing metadata such as Style Type (Accessory), No of Item(s) (1 Set), Style No (2JE0025), Description (1), Style Category (Jewelry), Size Range (O / S), Intro Season Year (Winter 2021), Tech-Pack Due (3/16/2020), Status (In Progress), Design Contact, and Active (Yes). It also includes a small image of a pink jacket.
- Comments:** A section for adding and viewing comments, with columns for Comment and Modified By.

The **workspace** contains:

- **Copy:** Duplicate a Style Model workflow page from another Style.
- **Link/Break Link:** This toggle button “connects or disconnects” the current image from the Image Folder. Editing and updating linked images will apply the changes globally. Break the link if the edited image is only for the selected style.
- **Preview:** Create a report containing the Style Model details.
- **Change Log:** Lists all additions and modifications made within the Styles Model page.
- **Models Area:** Add pattern information from AccuMark’s storage database.
- **Material Association:** Link materials by fabric type and material code. The materials must be setup within the BOM and Measurement workflows before they are listed here.
- **Style(s) Header Information:** Expand the Style Class Header, using the green arrow, to reveal the Style’s details.
- **Comments:** Add a comment to share with other viewers.

Style Folder-Style Model User Guide V8.X

Style Header Information

The Style's details are listed within the style header information section of the *Style - Model* page.

1. Click the **top green arrow** to expand/collapse the Style header information area.

## Style Folder-Style Model User Guide V8.X

### Add an AccuMark Model

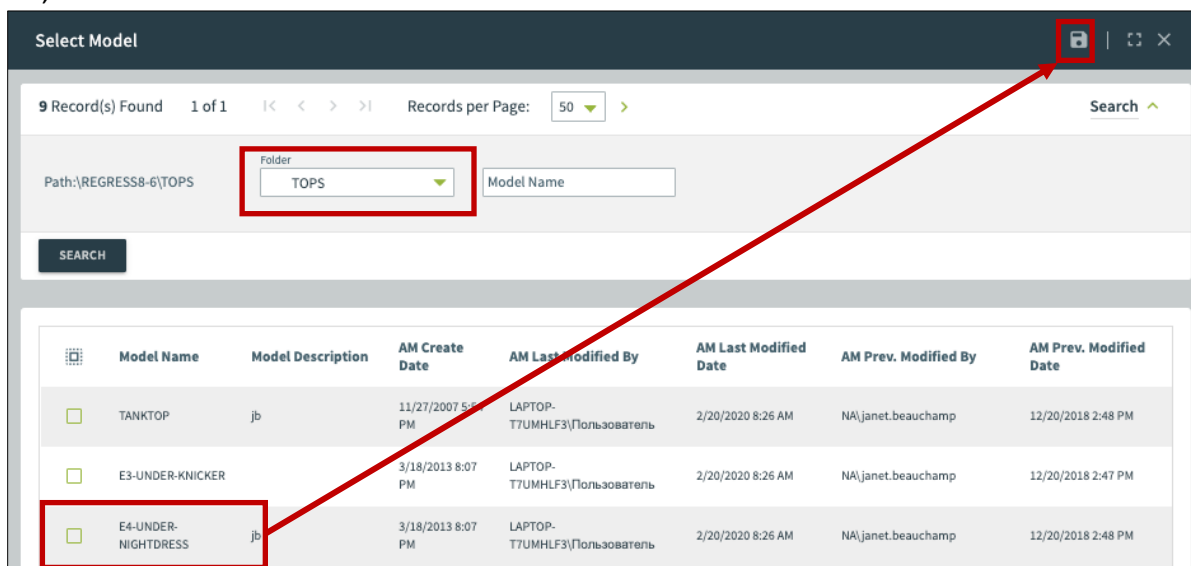

This most commonly used feature easily integrates AccuMark models into YuniquePLM.

1. Import a model from the AccuMark database by clicking the **add** button. A new window opens.

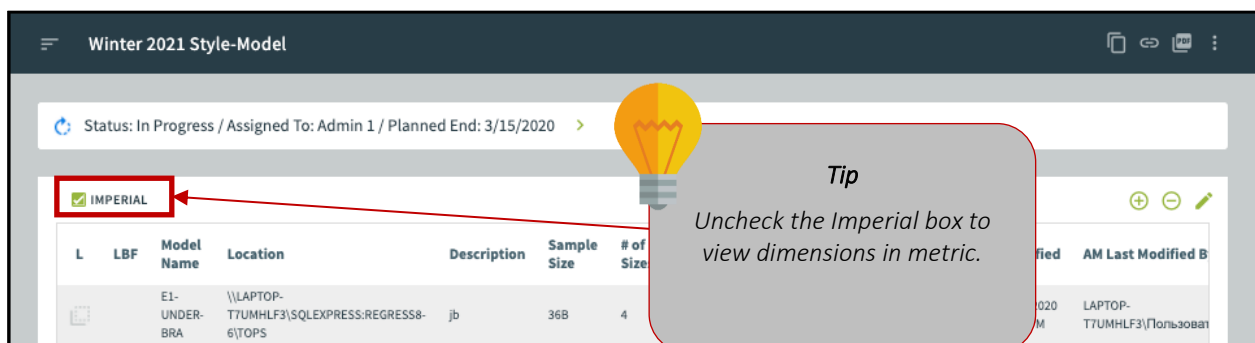

2. Use the **Folder** drop-down to navigate through AccuMark's storage area hierarchy. This is where the desired *AccuMark* model is saved. *Note: An AccuMark PLM integration setup is required to add a Style Model. Refer to the YuniquePLM AccuMark Integration user guide for further details.*

The window refreshes once a selection is made from the folder drop-down. Select a **model** from the list, then click **save**.

3. The selected model will appear in the *Style-Model* workflow main page. Each entry will contain the linked symbol and will update whenever the page is refreshed or reopened. If unlinked, then every field can be edited.

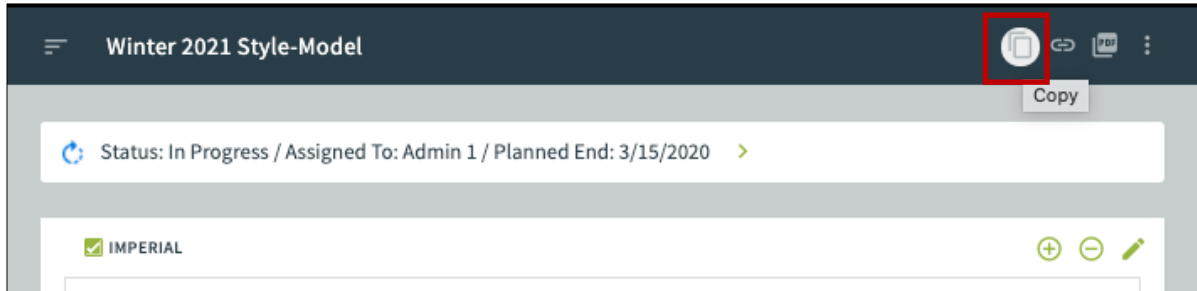

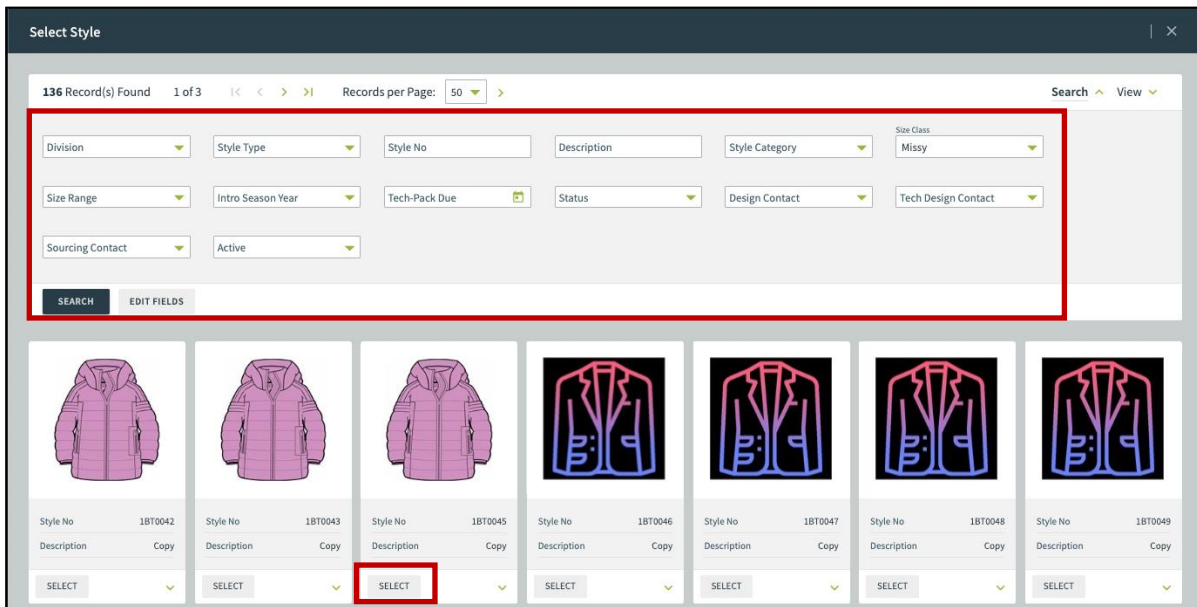

## Style Folder-Style Model User Guide V8.X

### Copy Another Style's Model

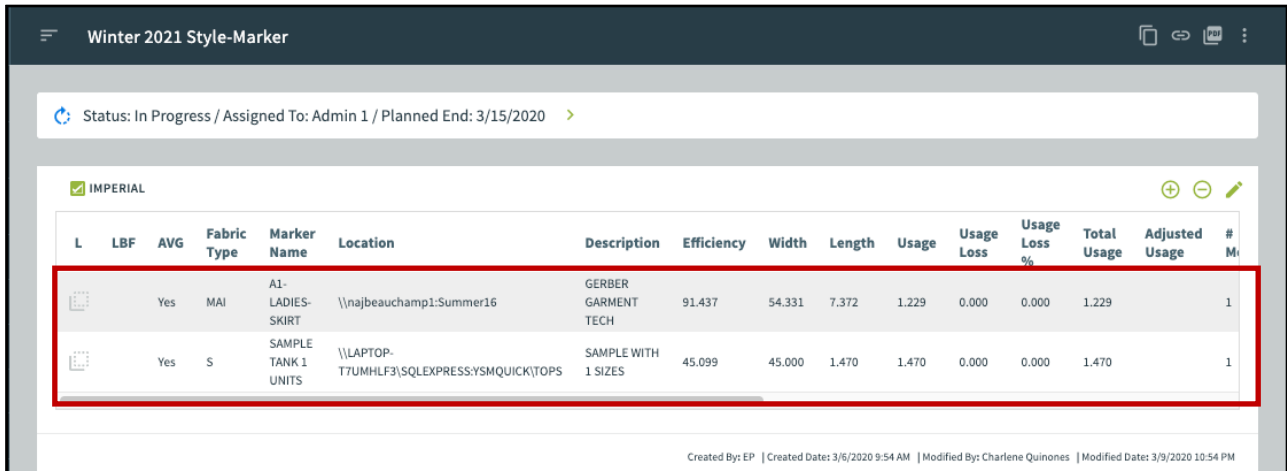

- Another way to add a model is to copy one associated to another style within **YuniquePLM**. Click the **copy** button to open its window.

- Use the **search fields** to filter the selections accordingly and choose an appropriate style to copy the Model page. Click the desired Style's **select** button. The page closes and returns you to the main Style-Model page.

- Now the copied model items are listed in the Style-Model workflow main page.

## Style Folder-Style Model User Guide V8.X

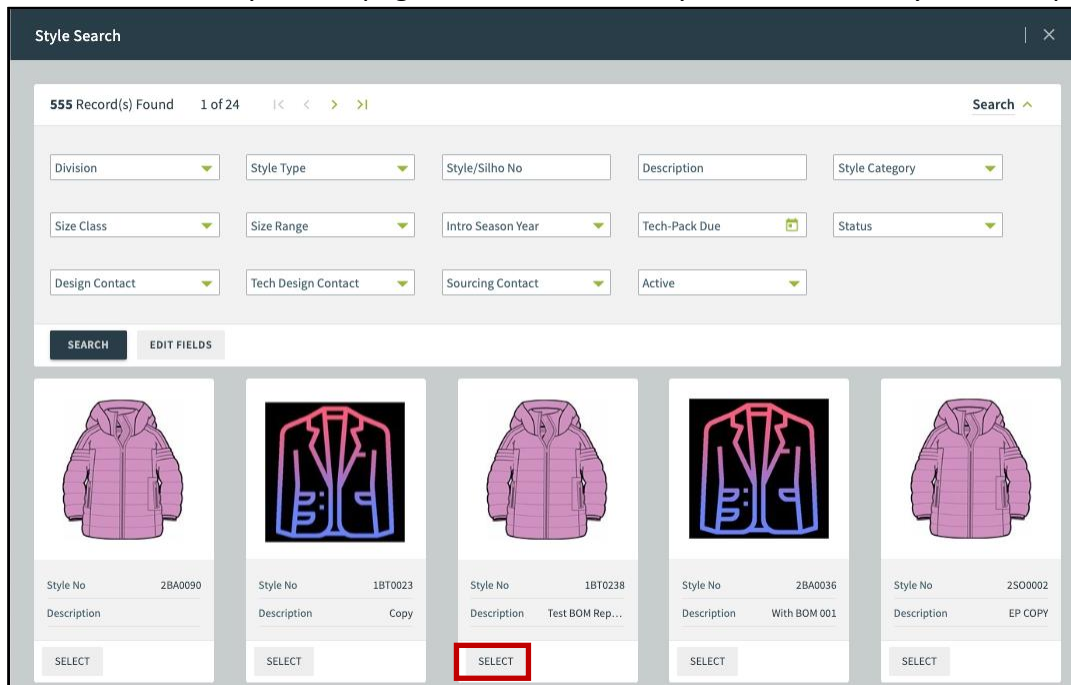

### Link

Tie a Style-Model to the current selection and seamlessly update styles when needed.

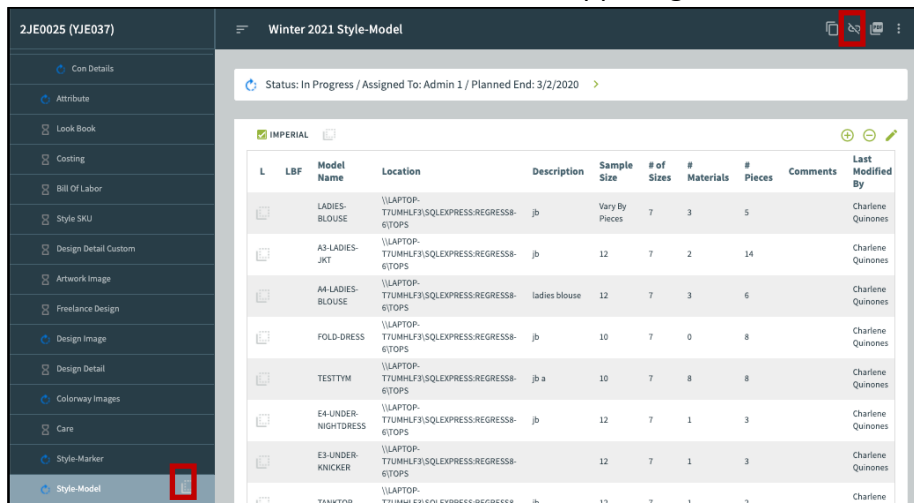

1. Link the current style to another by pressing the **link** button. A new window with a list of Styles is shown.

2. Locate a desired style from the list of available styles. Press the desired Style's **select** button to link with the current style. The page closes and returns you to the main *Style-Model* page.

3. The *Style-Model* page now displays an **Unlink** icon within the left navigation bar. This signifies the link between both Style-Models; so when the workflow is updated, so is the linked Style. If a global update is not desired, select the **Unlink** icon in the upper right hand corner.

## Style Folder-Style Model User Guide V8.X

### Edit a Model

1. Click a **desired model row** to view and edit the model details within a new window.

L	LBF	Model Name	Location	Description	Sample Size	# of Sizes	# Materials	# Pieces	Comments	Last Modified By	Last Modified Date	AM Last Modified B
		E1-UNDER-BRA	\\LAPTOP-T7UMHLF3\SQLEXPRESS:REGRESS8-6\TOPS	jb	368	4	2	4		Charlene Quinones	3/16/2020 9:33 PM	LAPTOP-T7UMHLF3\Пользоват
		E2-UNDER-SWIM	\\LAPTOP-T7UMHLF3\SQLEXPRESS:REGRESS8-6\TOPS		12	7	1	2		Charlene Quinones	3/10/2020 1:45 AM	LAPTOP-T7UMHLF3\Пользоват

2. The edit model window opens and displays the model's description and a list of pieces shown in the *List* tab (shown at the bottom of the screen.) The pieces are listed in the same order as they are in the AccuMark model editor. Users can **add/edit comments** for the model or for each model's detail line item or launch the AccuMark application by pressing the **Launch Model Editor** or **Launch Pattern Design** buttons.

**Linked: Checked vs. Unchecked**

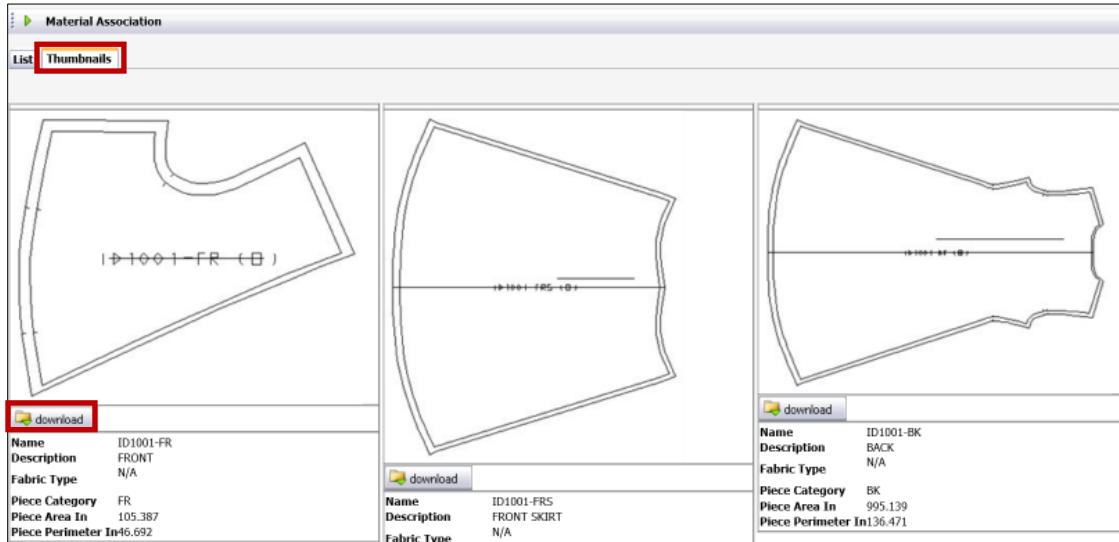

If the Linked checkbox is **unchecked** – most of the fields will be editable, but they will no longer be updated from the database.

As long as the Linked box remains **checked** and the page/bubble is selected, the data will be refreshed to display any changes made in **AccuMark**.

Name	Fabric Type	Piece Category	Description	Original	Flip X	Flip Y	Flip X,Y	Comments	Piece Area In	Rule Table Name
4009-BRA	N/A	INSIDE	BRA	1	0	0	0		24.391	BRA
4010-BRA	N/A	TOP-BUST	BRA	1	0	0	0		14.474	BRA
4011-BRA	N/A	BOTTOM-BUST	BRA	1	0	0	0		13.855	BRA

Style Folder-Style Model User Guide V8.X

- Click the **Thumbnail** tab to view a representative image of each piece within the Model selected. Each piece is downloadable by clicking the **download** button at the bottom of every image.

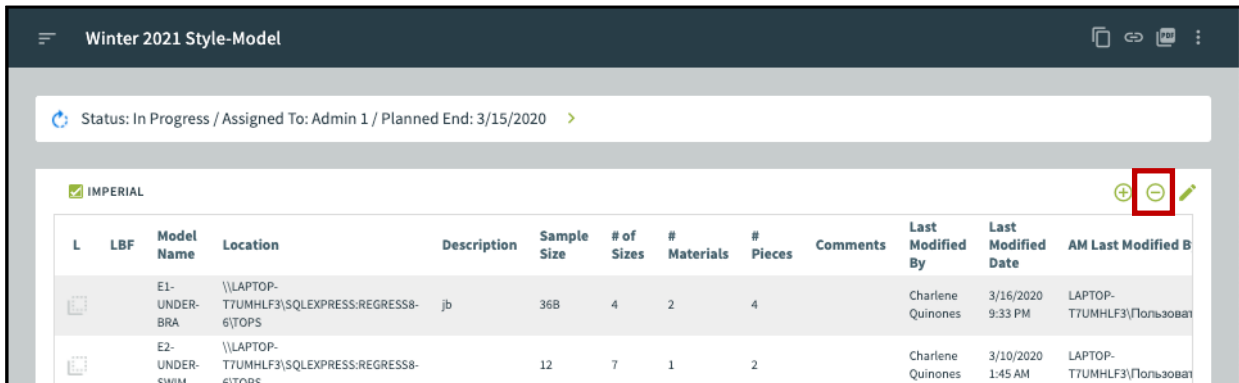

- Click **save** once changes are made.

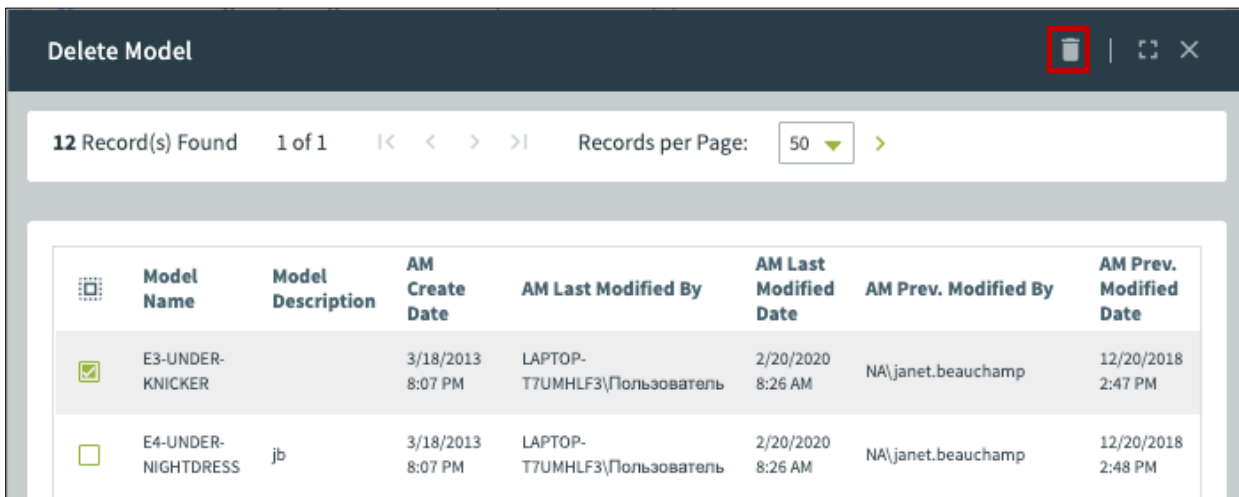

## Style Folder-Style Model User Guide V8.X

### Remove Models

1. Delete existing models by pressing the **remove** button. A pop-up window opens.

2. Place a **checkmark** next to each desired model then click the **trash** icon to delete the selections.

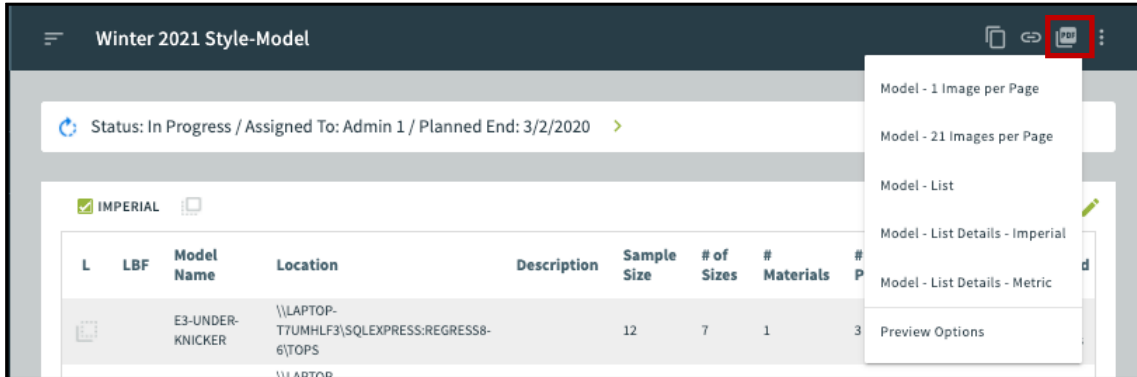

3. A confirmation window opens. Select **Yes** to proceed or **No** to cancel. The popup automatically closes and returns to the *Style-Model* main page.

## Style Folder-Style Model User Guide V8.X

### Preview

1. Generate a *Style - Model* report by clicking the **preview** button. A drop-down opens to reveal a list of available reports.
2. Select a **report** from the list.

3. The user is immediately notified with two notifications, where the first states that the report is currently being generated, while the second states the report has been successfully generated. Click on the notification to view the report.

**Note:** Users may also select *Preview Options* located at the bottom of the list. This functionality allows the user to select a preferred language and default report. Keep in mind, these settings are specific to this workflow.

4. Click the **Close** button to return to the *Style - Model* main page.
